

Introduction to Systematic Review and Meta-Analysis of health research Workshop

When: Thursday, May 12, 2022, 9:00 a.m. – 12 a.m.

Where: A3 Lecture hall ZIM 1: A3 Lecture hall Zentrum für Innere Medizin (ZIM) 1, Floor -1
Oberdürrbacher Str. 6, 97080 Würzburg (site plan on page 2).

Course outline: We will introduce methods to perform a systematic review and meta-analysis in health research. The workshop will cover how to formulate a research question, define inclusion and exclusion criteria, search for the evidence, extract and organize data, and perform a meta-analysis. A special focus will be on the analysis of diagnostic accuracy and data from randomized controlled trials. This is a practical skills course, with short lessons and small group activities, addressed to early or mid-career health researchers, as well as to doctoral students, interested in strengthening their methodological skills in Systematic Reviews and Meta-analysis.

Registration required. [Click here to register](#)

(Details on COVID-19 regulations to attend in person will be provided upon registration).

Dr. Mark Herbert Ebell, M.D., M.S., is a family physician and an internationally renowned expert in evidence based medicine and clinical decision-making, former member of the US Preventive Services Task Force. He is a Professor for Epidemiology in the College of Public Health at the University of Georgia, Editor-in-Chief of Essential Evidence Plus, a primary care clinical decision support system, deputy editor of the journal American Family Physician and author of more than 500 international peer-reviewed articles.
